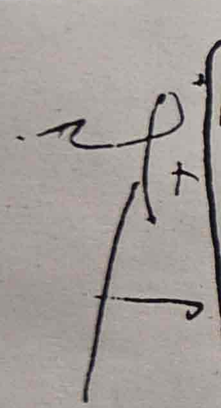
Pork tapeworms, once all but eradicated from the U.S. pork industry, have returned via afflicted Mexican immigrants, the *El Paso Times* reported November 4. The tapeworms can grow up to 10 feet in length, and may live for a decade. Brain cysts caused by pork tapeworm eggs can cause hallucinations, speech and vision impediments, severe headaches, strokes, epileptic seizures, and sometimes death.



Of course the anti-vivisection movement is composed largely of people whose main concern is for the suffering animals, but the unfortunate fact of life is that whilst people think that vaccines are beneficial, orthodox cancer treatments cure people, animal organs can be transplanted into humans, and so on, and that all medical advances past, present and future are a result of animal research, vivisection will never, repeat never, be abolished.

THE PRICE WE PAY FOR LIVING IN A FREE COUNTRY IS THAT GREEDY, SELF-SERVING, TORTURE/DEATH MERCHANTS HAVE A RIGHT TO SPEAK THEIR MINDS THROUGH SHAMEFUL LIES!

Just think of the fact, that by the year 2000, American taxpayers will be forced to spend one full trillion dollars on "health care"!

That's $1,000,000,000,000.00. Why don't we have cures for cancer, Alzheimer's, epilepsy, AIDS, Lupus, muscular dystrophy, the common cold?

Say no to bad science. Say no to vivisection!

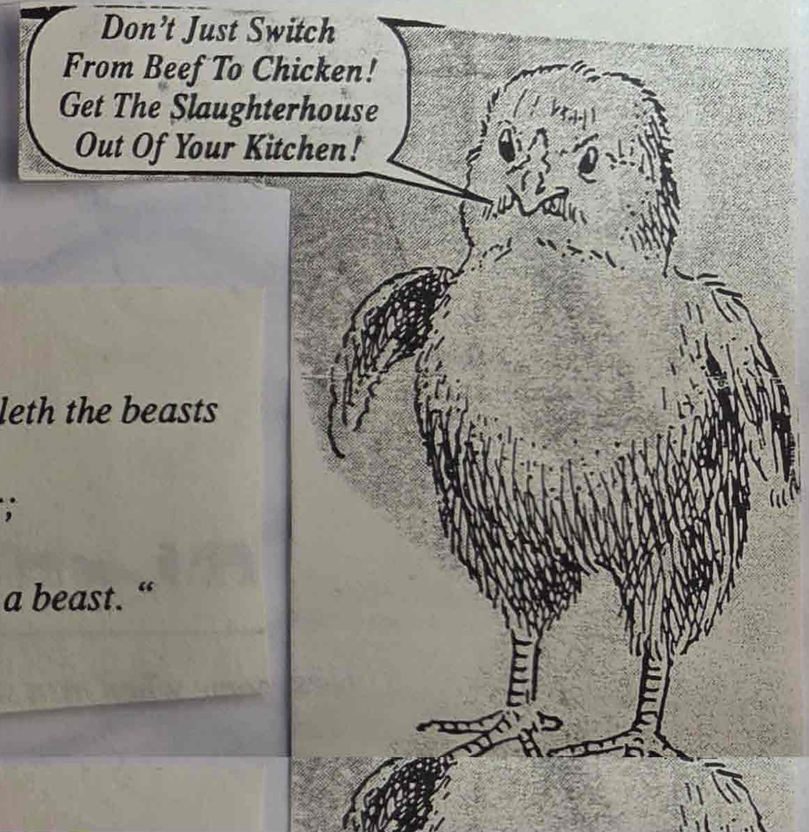
MEDICINE IS A COLLECTION OF UNCERTAIN PRESCRIPTIONS, THE RESULTS OF WHICH, TAKEN COLLECTIVELY, ARE MORE FATAL THAN USEFUL TO MANKIND.
Napoleon Bonaparte



"I gave my beauty and youth to man... I now give my wisdom and the rest of my life to the animals." Brigitte Bardot.[1]

"For that which befalleth the sons of men befalleth the beasts
Even one thing befalleth them:
as the one dieth, so dieth the other;
yea, they have all one breath,
so that a man hath no pre-eminence above a beast. "

(ECCLESIASTES 3:19)

MEAT STINKS

You can shake it, bake it, broil it, or boil it, but it's **still** the decomposing corpse of an abused animal.

OUR NATURAL INSTINCT?

It is also obvious that our sensibilities are not inclined towards flesh food. All meat-eaters (other than the scavengers: vultures, hyenas, etc.) kill their own prey and eat it in its natural state. Most of us must have our meat slaughtered by proxy, as we would be sickened if forced to kill the animals ourselves. Instead of eating meat in its original state, we age it, and we boil, bake, fry, or broil it, making sure the meat is first suitably "tenderized", and is well-disguised with sauces, spices, and gravies.

If we observe a tiger or leopard stalking its prey, killing, and ripping it apart with only fang and claw, and eating it raw, we may then deduce that this animal has a carnivorous instinct. Most humans would become sick to their stomachs at the prospect of killing and eating an animal.

On the other hand, a bowlful of grapes, cherries and peaches would make any normal human's mouth water; and even the prospect of picking them and eating them fresh from the tree would convey no unpleasant or repulsive sounds, sights, smells, or thoughts. The same bowl of fruit would generally have no attraction whatsoever for the carnivore.

ANIMAL CRUELTY

Many people nowadays have been lulled into a sense of complacency by the thought that animals are now slaughtered "humanely", thus presumably removing any possible humanitarian objection to the eating of meat.

Unfortunately, nothing could be further from the actual facts of life . . . and death.

The entire life of a captive "food animal" is an unnatural one of artificial breeding, vicious castration and/or hormone stimulation, feeding of abnormal diet for fattening purposes, and eventually long rides in intense discomfort to the ultimate end. The holding pens, the electric prods and tail-twisting, the abject terror and fright, the accidental misses of the "humane slaughter" stunning device—all these are still very much a part of the most "modern" animal raising, shipping and slaughtering. To accept all this and only oppose the callous brutality of the last few seconds of the animal's life, is to debase and corrupt the very word "humane"! With the exception of the moment of slaughter itself, all the other cruelties in the animal's life may remain exactly the same.

Nor, for that matter, is all slaughtering done by modern or "humane" methods and you cannot tell how your meat was raised, or shipped, or killed.

Rescue workers found Mark Tipton, 24, in a field near Peoria, Illinois, with a steel animal trap clamped on his thumb and penis.

He said he was on a hunting trip and fell down on the trap while urinating. Authorities charged him with trespassing. News: April/May 1989

GOOD!

It Takes Far Less Land to Feed a Total Vegetarian

To feed a meat-eater requires 3¼ acres of agricultural land per year.

To feed a vegetarian who also eats dairy and egg products requires ½ acre of land — and feeding a total vegetarian, who eats no dairy or egg products, actually requires only 1/6 of an acre, according to Vegetarian Times.

EVIL EXISTS BECAUSE GOOD PEOPLE DO NOTHING AGAINST IT!

"You have to love animals for what they are or leave them alone. The best thing you can do for them if you love them is leave them alone and see that other people do too."

Hi Pamela,

I've basically given up all meat except fish. I'd like to give up fish as well but I'm afraid I would get enough protein in my diet if I do. Could you tell me if I ate tofu and boca burgers would I be getting enough protein to make up for the loss of fish in my diet? If you can't answer this question maybe you could point me in the right direction.

Thank you in advance. Keep up the good work, you're doing a great job.

Hello, friends.

I am preparing a short book tentatively entitled "Vegetarianism as Christian Witness," and I plan to include an appendix that lists organizations that promote veganism/vegetarianism with a short (<50 word) description that highlights what each organization does and what makes it distinctive. In order to do my best to accurately reflect each organization's contribution to veg. advocacy, I would like to request that you prepare a statement (which I might edit for style or substance) or a short list of things that you would like me to mention. Please e-mail me at
st[redacted]pring.com or send to the address above. Thank-you.

In peace,

I received a call today from Craig C[redacted]e, who introduced himself as a sponsor of the 101 Reasons. He said he wanted to renew his sponsorship with a contribution of $50. He has been active in distributing the Reasons, and wanted to know if he could receive a bunch more to personally hand out to people. He mentioned that he has a very close relationship with the manager of a major health food store in his area, and thought the store would be a good place for exhibiting both our publications. The name of the store is [redacted]ce Natural Foods, Manager: Al[redacted]er: 5[redacted]3.

Please give Craig a call back at 5[redacted]8. I'm not sure of the location of his area code. I hope it is not too long distance. The store would be a good place for exhibiting both our publications. The name of the store is [redacted]ce Natural Foods, Manager: Al[redacted]er: 5[redacted]3.

To Whom It May Concern:

About seven months ago, I became a vegetarian for ethical reasons. My family and friends did not support my decision, for the most part. Recently, I found "101 Reasons Why I'm a Vegetarian" on your web site. The list gives great reasons to back up my choice. I would like a copy of this list. Enclosed are a dollar and a first class stamp. Please send this to the address printed above. Thank you!

Dear VivaVegie Society,

I would like to become a card-carruing member of your organization and so have enclosed $15 in hopes that I am worthy. I'm afraid I'm not vegan, as my parents do not permit me to be, but I am vegetarian. I live in Orange County, CA, where no one I know is vegan. So when you send me my first issue of *The VivaVine*, would it be too much trouble for you to also send the correct
